PROFILE SUMMARY

Aspiring Data Analyst and MSc Data Science candidate with hands-on internship experience and independently deployed AI-powered analytics platforms. Skilled in Python, SQL, Power BI, Tableau, Scikit-learn, Streamlit, and OpenAI API integration. Built and publicly deployed enterprise-grade ML pipelines, predictive models, RAG systems, and interactive dashboards that transform complex datasets into actionable business insights. Strong foundation in feature engineering, data preprocessing, statistical analysis, and cloud deployment.

TECHNICAL SKILLS

Languages & Query: Python, R, SQL

BI & Visualization: Power BI, Tableau, Plotly, Streamlit, Pandas, NumPy

ML & AI: Scikit-learn, Machine Learning, AutoML, Predictive Modeling, Feature Engineering, Feature Selection, OpenAI API, RAG, FAISS

Data Engineering: ETL Pipelines, Apache Spark, Databricks, Azure Data Factory, Statistical Analysis

Cloud & DevOps: Cloud Deployment, GitHub, Jupyter Notebook, VS Code

CERTIFICATIONS

Certified Data Analytics Professional | IABAC — International Association of Business Analytics Certifications | *Credential ID: IAB1120175186 2025*

EXPERIENCE

RUBIXE INNOVATIVE AI TECH SOLUTIONS | Data Analyst Intern

2024 – 2025

- Analysed 50K+ row datasets using statistical techniques and ML algorithms, delivering insights that directly informed business decisions.
- Built and maintained interactive Power BI and Tableau dashboards adopted by 4 stakeholders, reducing manual reporting effort significantly.
- Leveraged Python, R, and SQL across the full analysis pipeline — from data extraction and cleaning through to insight delivery.
- Spearheaded end-to-end data collection, cleaning, and organisation of large datasets (10K–100K rows) ensuring high data integrity and accuracy.

PROJECTS

HELIOS AI — AUTONOMOUS SPACE BIOLAB INTELLIGENCE PLATFORM | Python, Streamlit, Scikit-learn, FAISS, Plotly, RAG | [Link](#)

May 2026

Publicly deployed AI monitoring platform for autonomous space biolab environments.

- Built telemetry analytics, anomaly detection, mission risk assessment, and ML-based prediction workflows serving as a full autonomous monitoring suite.
- Implemented a RAG pipeline with FAISS semantic search enabling AI-assisted querying of scientific PDFs, mission documents, and biological experiment data.
- Delivered an end-to-end analytics dashboard with knowledge graph generation, AI scientific assistant, and automated PDF mission reporting.

AI DATA INTELLIGENCE PLATFORM | Python, Streamlit, Scikit-learn, Plotly, OpenAI API | [Link](#)

April 2026

Publicly deployed AutoML platform enabling non-technical users to run end-to-end ML workflows without writing code.

- Built automated data cleaning, preprocessing, feature engineering, and AutoML pipeline covering classification, regression, feature selection, and model comparison.
- Integrated 6 ML algorithms (Logistic Regression, Random Forest, SVM, Gradient Boosting, Linear Regression, Extra Trees) with a live real-time prediction console.
- Designed BI dashboards with Heatmaps, Scatter Plots, Histograms, Pie Charts, and KPI reports for interactive business intelligence reporting.

ENTERPRISE AI BUSINESS COPILOT | Python, Streamlit, Scikit-learn, Plotly, OpenAI API | [Link](#)

April 2026

Publicly deployed AI copilot providing automated business insights and decision support via natural-language interaction.

- Developed automated data preprocessing, ML workflows, predictive analytics, and interactive BI dashboards in a single enterprise-grade platform.
- Built advanced reporting modules with heatmaps, scatter plots, KPI dashboards, AutoML workflows, and AI-driven insights for decision support systems.

EDUCATION

Christ University Bangalore | Bengaluru, India

Jun 2025 – Mar 2027

Master of Science in Data Science (In Progress)

Mahatma Gandhi University | Kerala, India

Jun 2019 – Mar 2022

Bachelor of Computer Applications

RELEVANT COURSEWORK

Data Integrity • Data Visualization • Data Governance • Data Manipulation • Generative AI • Collaboration • Requirement Gathering • Business Impact Analysis
